Important notice regarding changes to bus timetables – starting Sunday 20 October

The NSW Government has carried out the biggest rewrite of public transport timetables – including buses, trains and ferries - to get more out the network for customers.

The new timetable introduces more than 1000 extra train services, 1700 extra bus services and 55 extra ferry services every week.

The timetables have been designed to improve connections for customers catching different types of public transport by minimising how long you have to wait when changing from a bus to a train or ferry.

Local impacts to the Liverpool, Fairfield and Holroyd areas

Your new local bus operator Transit Systems has worked with the NSW Government to minimise impacts that the new bus timetables may have on services that are popular with school students. Whilst the majority of school services will remain unchanged, students and schools should take time to review the revised advice sheets made available on the Transit Systems website at http://www.transitsystems.com.au/sydney/

Students that use the general route network provided by Transit Systems (route numbers 800 – 823 and T80) are particularly encouraged to familiarise themselves with the new route timetables before Monday 21 October. Timetables and trip planning advice is available from the following sources:

- Route timetables and school advice sheets http://www.transitsystems.com.au/sydney/
- Alternatively via telephone on 13 15 00
- Information regarding the timetable change http://www.131500.com.au/timetable-changes

Kind regards,

Cameron Smith
